

## ABOUT US

Our business started in 2016 as we were trying to rescue the rapid decaying tomatoes on the farm in 2016 due to a saturated market. We thought of preserving perishable food for off season while helping farmers to benefit from their harvest and as well as adding value to the product. Our company is in the industry of Food Agro-processing, where we dehydrate fruits and adding value to edible nuts. We have different varieties of dried fruits and nuts.

## OUR PRODUCTS
